

# LAROCHELLE®

ISO 9001 : 2000

Since 1956

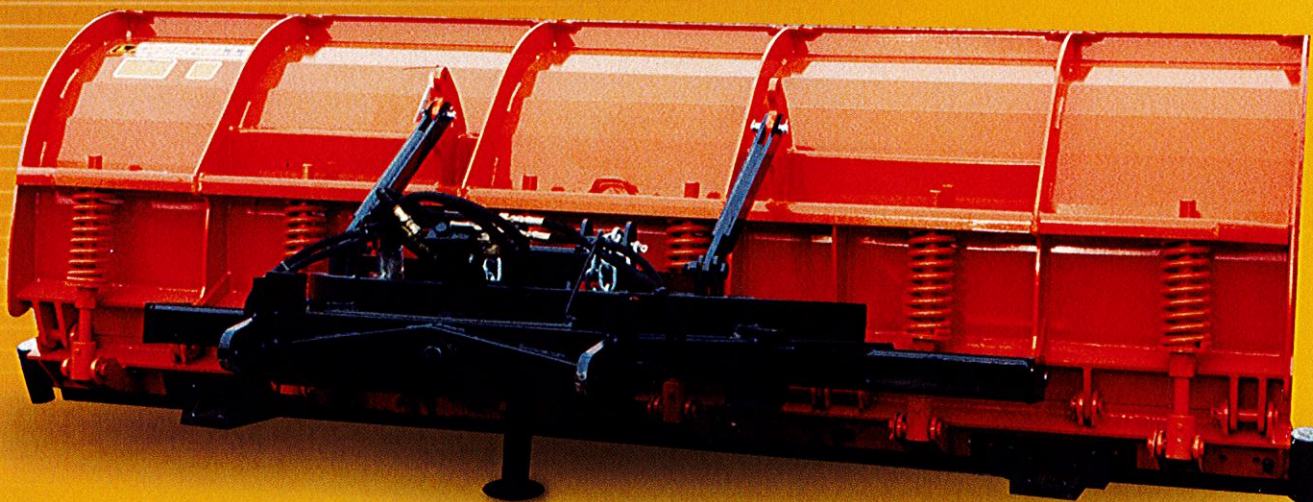

## Trip edge

## POWER REVERSIBLE PLOW

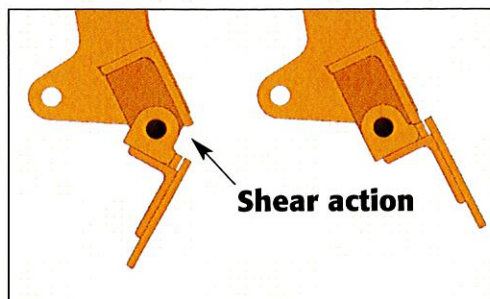

**Ideal for rural and urban applications**

- For low and medium plowing speed
- When encountering obstacles, the bottom blade section trips, goes over the obstacle and returns to its original plowing position.
- Trip blade mechanism designed with 6 individually adjustable compression springs
- Break formed moldboard:
  - Superior to a rolled type moldboard
  - More resistant and durable
  - Improved snow load breakage

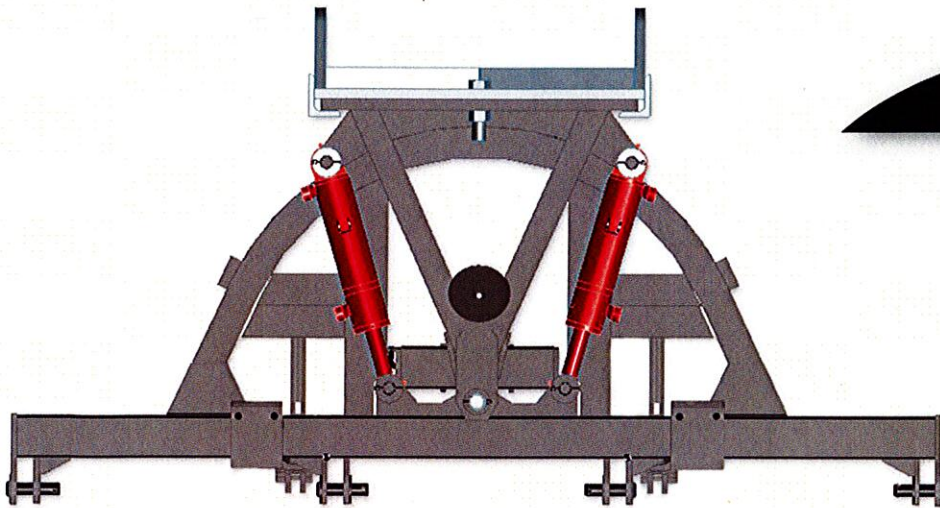

The recoil force of each compression spring can be adjusted on its threaded shaft for a precise adjustment to your specific plowing needs. This exclusive feature also allows for an easier and safer maintenance to the trip blade mechanism.

### Shear action

The engineering of the trip blade mechanism provides ice breaking action and prevents snow build up.

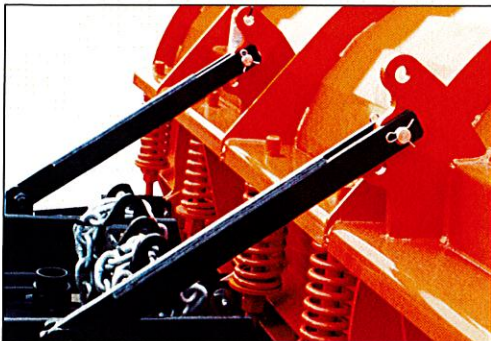

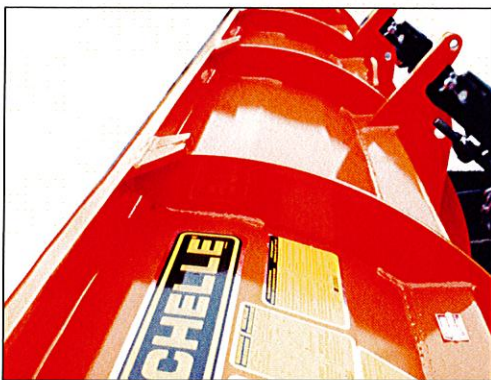

## EXCLUSIVE FEATURES

### Power reversing push frame

- Double acting cylinders protected inside the semi-circle assembly and not exposed on each side
- Cushion valve with pre-set pressure release protects the hydraulic cylinders
- Reversing angle up to 37°: reduces plowing effort... providing fuel savings

- Adjustable plow attack angle (70°, 75°, 80°)

### "Fork" type ribs connection

- Prevents top of moldboard weldment failures
- Better distribution of plowing stresses
- Allows water drainage

## OTHER FEATURES

- 4 connecting points between moldboard and push frame
- Backer angle 6" X 4" X 5/8"
- 2 moldboard shoes
- Parking stand

## OPTIONS

- Polymer moldboard liner
- 3 sections trip blade
- Rubber deflector
- Carbide blade and shoes
- Curb shoes
- Screw adjustable push frame shoes
